S = Self-Stick
U = Unpunched/Solid

**Customized Options**

Profiles are available in custom lengths, colors and finishes upon request.

We offer powder coating of all aluminum profiles in RAL colors with three finish options: matt, semi-matt and high gloss.

Our natural looking wood decors are digitally printed paper foil with AC3 abrasion-resistant hot coating designed for light commercial and residential applications. The aluminum profile is wrapped with this high quality foil and obtains a natural look due to the wood grain patterning of the foil. The higher abrasion-resistant AC5 coating is designed for heavy commercial applications and is available upon request.

We also offer digital printing color matching to any type of hard and resilient floor covering upon request with additional lead time.

All customized options require a minimum quantity and longer lead times are to be expected.

Please contact your Küberit customer service representative for details.
